B Beef Bone Ramen

A signature soul food representing Yonago

Gyukotsu Ramen

Rare even on a national level?
A ramen characterized by the natural sweetness and richness of beef.
Each shop offers its own unique flavor and craftsmanship!

Ramen made with a broth extracted from beef bones. With curly noodles and simple toppings such as bean sprouts, bamboo shoots, and green onions, typically soy sauce- or salt-based. In central and western Tottori, this ramen has long been an everyday staple. However, ramen made with beef bone broth is quite rare nationwide, and another unique feature is that shops serving it are concentrated in this region.
The carefully simmered broth has a rich, toasty beef aroma and a subtly sweet umami that you'll want to drink down to the last drop.
With a history of about half a century, this ramen continues to be passed down today, evoking a nostalgic, Showa-era feel.

With over 30 gyukotsu ramen shops in Yonago alone, they compete and refine their flavors every day.

Half-portion gyukotsu ramen is also recommended for tasting your way around!

Half bowls are offered so you can try and enjoy the flavors of many different shops.

*Participating restaurants offering half bowls are listed on the Gyukotsu Ramen Alliance website.
